Student Reflections about NOLS experience

What was most rewarding about this course?

- When we discussed things, my instructors cared about my point of view.
- The pride of being able to finish the week trail and hike and knowing I am independent and self-responsible is the most rewarding thing about the course.
- Work with other people that we haven't worked with, learning how to make decisions properly, learning how to succeed in the challenges and help others as well taking care of each other.

What additional info would have helped you be better prepared?

- I would have liked if there were videos similar to what the instructors taught us that would give us an idea of what to expect.
- I would have appreciated it if they had told me the water we were gonna be drinking from wouldn't always be as clear as I thought.

Comments about food and terrain

- The terrain was amazing and the reason why it was amazing was because there were great views along with the lessons and activities that everyone enjoyed. There were many paths that were challenging and needed a lot of participation and discussion.
- There was so much food. We still have leftovers even after the last day. And the food was really good.
